

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE

THIS volume continues the records contained in the "Third Book Town of Providence," otherwise called "The Book with Brass Clasps," and includes all the records contained in that book from page 121 to page 312, both inclusive, as it is now arranged. The records of the Town Meeting terminate at page 157 in the original, and at page 53 in this book; the remainder of the original containing enrollments of deeds, births, marriages and deaths, together with other miscellaneous records.

As will be noticed, the last date of a Town Meeting is on the 16th of February, 1675, and it is the last record of such a meeting until the year 1692. Commencing with that year the records of the Town Meeting and the Town Council were kept separately, and as stated in the preface to Volume III, there are no records of meetings for town purposes in the city's possession covering the seventeen years between those two dates.

For convenience, the following explanation is here repeated to save the trouble of referring to the preceding volumes.

The resolution of the City Council under which the Record Commissioners were appointed, was approved March 6, 1891, and is as follows:

“RESOLVED, That Horatio Rogers, George M. Carpenter, and Edward Field, are hereby appointed record commissioners, who shall serve without compensation, for the purpose of collecting and printing the early records of the town of Providence. And said commissioners are hereby authorized to expend the sum of one thousand dollars for collecting and printing said records, said sum to be charged to the appropriation for printing.”

Other resolutions have been approved from time to time, making appropriations for the prosecution of the work.

The same method has been pursued by the commissioners in preparing this volume for the press as was followed in the preceding volumes, and the same signs have likewise been used in printing as in those volumes. The figures at the top of the pages and enclosed in brackets indicate the paging of this transcript, and the heavy figures enclosed in brackets represent the paging of the original book as it is now bound and numbered: letters, words, and figures in italics are missing or illegible in the original book, and have been supplied from the transcript made in 1800: this mark | shows the beginning and the end of interlineations in the original: words or letters printed in parentheses are so found in the original: brackets enclosing

blank space indicate that something is missing or illegible in the original, and cannot be supplied from the transcript made in 1800; and the marks made by illiterate persons to instruments in place of their signatures are represented by X, the conventional sign commonly used for that purpose. Three indexes accompany this volume, viz.: an index to names, an index to Indian names, and an index to subjects.

HORATIO ROGERS,
G. M. CARPENTER,
EDWARD FIELD.
